

Package: thinkthen (via r-universe)

October 3, 2026

Type Package

Title The ThinkThen Verbs for R

Version 0.1.2

Description The eight verbs (decide, choose, score, tag, filter, rank, find, annotate) plus recognize and relate, with a tt_ prefix, over the thinkthen Rust library. A column goes in and a column comes out. NA is ``not sure". A bulk call crosses into the engine once and runs at the engine's throttle. Errors carry one of six kinds and a retry signal.
